

# Access Gangways

Safer more efficient truck and rail car access equipment

Carbis can design, fabricate, and install Access Gangways and Ramps that best fit your loading terminal's requirements. Whether your terminal loads trucks, rail cars, hopper trucks, isotainers, etc., we have the bulk loading fall prevention equipment you require.

## Benefits

- Provides safer & easier access to the top of tank trucks and rail cars
- Heavy-duty design to work in the most rigorous environments, providing a long service life
- Fully factory assembled for easy installation

Can be modified to meet your specific needs

# Access Gangway - Folding Stair Type

Our most versatile gangway accommodates height variations in most tank cars, tank trucks, and hopper cars.

## Features

- Variations in width and length are available to meet your specific application
- Available in aluminum, steel (galvanized, primed, mill, or painted), or stainless steel to meet your site's environmental requirements; non-sparking aluminum is standard
- 500 lb. capacity to meet your most demanding requirements
- Padded lower edge helps prevent vehicle damage
- Open serrated slip-resistant walk surface maximizes footing in all climates
- Requires little maintenance and is repairable in the field
- Can be customized to fit site and platform requirements
- Can be mounted to operate as a fixed, pivoting, or track mounted gangway
- Optional self-leveling SAF-T Cages, designed specifically for vehicle type, help improve safety
- Covered by Carbis' 2 year warranty

**As with all Carbis equipment,  
can be modified to meet  
your specific needs**

# Access Gangway - Flat Ramp Type

Our most economical gangway is ideally suited to access uniform heights and types of transport equipment.

## Features

- Variations in width and length are available to meet your specific application
- Available in aluminum, steel (galvanized, primed, mill, or painted), or stainless steel to meet your site's environmental requirements; non-sparking aluminum is standard
- 500 lb. capacity to meet your most demanding requirements
- Padded lower edge helps prevent vehicle damage
- Open serrated slip-resistant walk surface maximizes footing in all climates
- Requires little maintenance and is repairable in the field
- Can be customized to fit site and platform requirements
- Can be mounted to operate as a fixed, pivoting, or track mounted gangway
- Optional self-leveling SAF-T Cages, designed specifically for vehicle type, help improve safety
- Covered by Carbis' 2 year warranty

**As with all Carbis equipment,  
can be modified to meet  
your specific needs**

# Access Gangway - Telescoping Ramp Type

Our telescoping rail car loading gangway ramp is ideal when vehicle height is fairly uniform. Manually operated extension ramp allows for some deviation in vehicle spotting.

## Features
