

Portable Freestanding Platform

Safe and efficient portable access equipment

The Carbis portable freestanding access platform can go almost anywhere, can access both trucks and rail cars, and provides excellent fall prevention.

Simple Bolt-Together Construction -

A two-person crew can have this put together and operational in 15 minutes!

Benefits

- Freestanding design prevents the unit having to come in contact with the vehicle
- Can be used on a wide range of vehicles
- Unique wheel design allows for a tighter turning radius and easier maneuvering to simplify spotting
- Easily maneuvered by one person

Can be modified to meet your specific needs

Travel Distance for Standard Units

TC8

From 9' 6" to 14' 0"

Can be modified to
meet your needs

- 1 Large SAF-T Cage allows for safe, easy access to hatch openings
- 2 16" foam-filled tires for easy mobility over rough terrain
- 3 Swivel dual wheel casters connected with a steering device to enhance maneuverability
- 4 Hand winch allows easy raising and lowering of platform
- 5 Leveling jacks on outriggers provide a more secure base
