Tractor Trailer Maintenance Platform

As pictured the following components were used: two fixed height frames with ladders, two cross handrails, two swivel caster assembly – end, and two rigid caster assembly.

Basic unit is 8' long, and can be expanded in 8' increments.

If the worker cannot walk on the trailer top, the rolling top work platform provides a work platform that can be rolled along the unit. Cap = 500 lbs.

Uses

- Inspections
- Repairs

Components

- Fixed height frame with ladder;
- Fixed height frame w/o ladder;
- Fixed height frame with ship's stairs;
- Adjustable height frame with ladder;
- Adjustable height frame with combo ship's stairs and ladder (stairs go to lowest elevation; access to higher elevations is from a ladder going up from the ship's stairs);
- Cross handrail;
- Swivel caster assembly – end;
- Swivel caster assembly – mid with top splice;
- Rigid caster assembly;
- Rolling top work platform;
- 8' track section for above platform;
- Hoist - provides an easy way to raise tools and equipment.

Safety Swing Gate

Spring loaded gate closes automatically to help prevent personnel inadvertently backing out of opening.

The background of the advertisement features a large blue semi-truck with a white trailer driving on a highway. To the left of the truck is a road sign for Route 2 East. The sky is blue with scattered clouds. The top of the page has a dark blue banner with the title text.
