

Crossover Component Systems

In Stock, Ready to Ship

OSHA compliant maintenance access fall prevention equipment, offered in a simple bolt-together package. The custom component system features just 7 primary OSHA compliant components with endless configurations to solve your most challenging access and safety needs.

Where is the Custom Component System used?
Everywhere you can think!

- **Chemical Plants:** allows access over piping, dykes, containment walls, etc...
- **HVAC:** roof top access to air conditioning units
- **Job Sites:** access to job trailers that can be removed and moved to next job site
- **Military:** used to access mobile laboratories and command centers
- **Building/Machine Maintenance:** easy-to-position access to hard-to-reach areas

- **Portable:** fits through most doorways, elevators, and stairwells
- **Expandable:** add/subtract pieces to fit changing needs
- **Lightweight:** does not require the use of forklifts or other heavy machinery
- **Adaptable:** 7 primary components provide multiple configurations
- **Simple:** common hand tools for simple bolt-together construction
- **OSHA Compliant:** components feature OSHA compliant walk surface, railings, and stairs
