

Spill Containment

Pans that Contain Drips, Spills, and Leaks

Need It Fast? Our Rapid Program Can Help — see pages 5-6

Rail Cars

If seals or valves fail while loading/unloading a rail car, have you taken the appropriate precautions?

Carbis' spill containment pans help you meet the required environmental spill contamination regulations

- Carbis' rail car spill containment track pans are designed to contain drips, spills, and leaks...and offer many years of reliable service
- Pans may be placed end to end for continuous coverage
- Pans are manufactured of heavy gauge carbon steel (standard); galvanized and stainless steel or aluminum are available to meet your site requirements
- Carbis' steel pans are stronger and more durable than fiberglass pans
- Stand-alone center pans are available for use in non-loading, staging, or storage locations
- Combo truck/rail spill pans available
- Can be supplied with optional steam heating and rain covers

Spills can be very expensive to both the environment and your facility— Carbis' pans address both issues
