Wide Truck Safety Cages

Need It Fast? Our Rapid Program Can Help - see pages 5-6

Wide safety cages provide complete fall prevention on top of trucks where multiple hatches need to be accessed for loading, unloading, venting, inspection, or sampling. The simple design can be easily configured to fit onto your existing structures or supplied with any platform and stair configuration.

Trucks

Isotainers

Cage encloses the full length of the vehicle

- Cage can be supplied with optional tracking handrails to allow the unit to service different length vehicles
- Power options include pneumatic, electric winch, air driven or electric hydraulics
- Self-supporting design requires no outboard support frames, eliminating the need for foundations
