Fall Prevention Solutions for Truck and Rail

Need It Fast? Our Rapid Program Can Help — see pages 5-6

Our elevating platform was designed to provide drivers and operators flexible and safe access onto trucks of varying heights and lengths for loading, sampling liquids, venting, etc.

- Can load tank trucks and iso-containers from the same unit, saving money by utilizing a single location to service various trucks
- Allows access to multiple hatch trailers from a single platform, eliminating the need to re-spot trucks, saving time and money
- Elevating platform can be used in conjunction with multiple product loading lines—consolidating loading into a single platform saves money and time, and frees up valuable space in process areas
- Hopper car systems also available

Elevating platform accommodates all sizes and types of trucks

Flip-Up Panels

Access multiple hatches along the entire length of the vehicle

Easy access to both level and sloped vehicles involving numerous hatches

Quick Guide

Easy Vehicle Spotting

Vertically Adjustable

Access Multiple Hatches
